PREMATURE BABY MILESTONE TRACKER

Celebrating every small victory, one milestone at a time

Premature babies often reach milestones later than full-term babies — and that's completely okay. Where possible, track progress using your baby's corrected (adjusted) age, calculated from their original due date rather than their actual birth date, until around age two. Every small step is worth celebrating.

Baby's Name: _____ Date of Birth: _____

Gestational Age at Birth: _____ weeks Birth Weight: _____ grams

Original Due Date: _____ Parent / Guardian: _____

NICU MILESTONES

✓	Milestone	Date Achieved	Corrected Age
	Placed on a ventilator / CPAP		
	First kangaroo care (skin-to-skin)		
	First breastmilk or bottle feed
