TSHIAMO'S HOPE FOUNDATION

NICU FEEDING LOG

Every millilitre is a milestone

Why Tracking Feeds Matters

- Helps the care team spot growth and tolerance patterns early
- Builds a clear record to share with doctors, nurses, and therapists
- Supports the gradual journey from tube, to bottle or breast, to full oral feeds
- Turns every millilitre gained into a small win worth celebrating

Baby's Name: _____ Date: _____

Corrected Age: _____ Current Weight: _____ g

FEED LOG — DAY 1

Time	Feed Type	Method	Offered (ml)	Taken (ml)	Tolerance	Notes

Feed Type: EBM (expressed breastmilk) · Formula · Fortified — Method: Breast · Bottle · NG/OG Tube — Tolerance: Settled · Spit up · Vomited · Residuals

Total feeds today: _____	Total ml offered: _____	Total ml taken: _____	Weight today: _____ g

FEED LOG — DAY 2

Time	Feed Type	Method	Offered (ml)	Taken (ml)	Tolerance	Notes

Feed Type: EBM (expressed breastmilk) · Formula · Fortified — Method: Breast · Bottle · NG/OG Tube — Tolerance: Settled · Spit up · Vomited · Residuals

Total feeds today: _____	Total ml offered: _____	Total ml taken: _____	Weight today: _____ g

FEED LOG — DAY 3

Time	Feed Type	Method	Offered (ml)	Taken (ml)	Tolerance	Notes

Feed Type: EBM (expressed breastmilk) · Formula · Fortified — Method: Breast · Bottle · NG/OG Tube — Tolerance: Settled · Spit up · Vomited · Residuals

Total feeds today: _____	Total ml offered: _____	Total ml taken: _____	Weight today: _____ g

Every millilitre gained is strength for the journey ahead. With love and hope, Tshiamo's Hope Foundation
